# Edoardo Debenedetti

Computer Engineering B.Sc. Student

---

## EDUCATION

### **Politecnico di Torino** – *Computer Engineering, “Laurea Triennale”*

October 2016 – July 2019 (expected), Turin (Italy)

At the end of the second year I passed all the exams I had to pass, with a 27.84/30 GPA.

### **Tongji University** – *ITE, “PoliTong” Exchange Program*

September 2017 – July 2018, Shanghai (China)

I attended the 2nd year classes and took the 2nd year exams in Shanghai as winner of “PoliTong” project scholarship. The field of study is “Information Technology Engineering”. I ended the year with a 4.38/5 GPA.

### **Military Naval School “F. Morosini”** – *Liceo Classico*

September 2013 – July 2016, Venice (Italy) – “Maturità Classica”, 90/100

As student of “Morosini”:

- I was appointed “Allievo Graduato” (*prefect*) of sophomores.
- I was member of the group that organized a 60.000€ budget gala.
- I took part to different training campaigns as patrol leader.

## EXPERIENCE

### **JEToP, Turin** – *IT Consultant*

April 2017 – Present

### **JEToP, Turin** – *Fundraising & Partnership Assistant*

October 2016 – June 2017

## SKILLS

- Programming and markup languages, frameworks:
  - **C**: excellent proficiency.
  - **Dart, Flutter**: good proficiency.
  - **Python, Java, HTML, CSS, MIPS assembly**: intermediate proficiency.
  - **JavaScript, MATLAB, TypeScript, NodeJS, WordPress, PHP**: basic proficiency.
- OSs: Windows, MacOS, Linux based.
- Tools: git, JetBrains IDEs, VS Code, Microsoft Office, Google Docs.

## PROJECTS

### **Pindery, an amazing party app** – *Flutter application*

**March 2018 – Present**

As project for the Software Engineering Course, I developed, teaming with two classmates, an open source, cross platform mobile application written with **Flutter**, using **Dart**. For the backend we are using Google **Firebase**. For this reason, we also used **TypeScript** to manage Firebase's **Cloud Functions**. The website of the application is [here](#) and its repository [here](#).

### **Yes4To Website** – *Website*

**April 2017 – July 2017**

As first project as IT Consultant in JEToP I was assigned, with a colleague, the development of the static website for Yes4To, an association based in Turin. The website is based on **WordPress** and is used to show some of the main features of the association. For the development we worked with **HTML**, **CSS** and some of **WordPress** advanced functions. The website is [here](#). The client appreciated our work, and asked JEToP to extend its website.

### **ThinkUp for Disability** – *Student competition*

**March 2017 – May 2017**

I was appointed, by JEToP's board, **project manager** of the event "ThinkUp for Disability", a student competition, whose aim was the development of wearable devices to help disabled people. Its structure was a contest in between a **business game** and a **hackathon**, since the participants had to sketch the design of a device and prove the feasibility of their projects. We got involved many **students**, **associations** and Polytechnic's **professors**.

## LANGUAGES

- **Italian**: mother tongue.
- **English**: fluent, First Certificate of English.
- **French**: intermediate proficiency.
- **Chinese**: basic proficiency.

## AWARDS

- **"Distintivo d'Onore"** – Award given by the "Naval School" to the best students of the year (top 10% of the course) who stand out at school, in sports and have an excellent disciplinary profile.
- **"Distintivo Marinaresco"** – Award given by the "Naval School" to the students who show an excellent attitude in nautical sports (8% of the course).
- **"PoliTong" Project grant** – Given to 11 among 35 students that participated to the selection.

## EXTRACURRICULAR ACTIVITIES

- **Exchange in Normandy** hosted by a Rotary Club's Family.
- **Swimmer** and **sailor**.
